3.1 Provision of medical care

3.2 Support for pupils with medical needs

3.3 Administration of medication

SECTION 4: Record Keeping

SECTION 5: Accident Reporting

SECTION 1 General Policy Statement

The Governors and Head teachers of WGSF accept their responsibility under the Health and Safety (First Aid) Regulations 1981. They acknowledge the need to provide adequate and appropriate equipment, facilities and personnel to enable timely and competent first aid for all employees, pupils and visitors if they are injured or become ill on site. The Governors are committed to the Regulations procedure for reporting accidents and recognise their statutory duty to comply with the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 2013.

This policy is the result of an assessment of local need considering the likely risks to staff, pupils and visitors. The policy works in conjunction with the Health and Safety, and Child Protection policies and is approved, implemented and reviewed by the Governing Body.

This policy informs all employees of the first-aid arrangements within the Foundation and forms part of the School Health Service. The provision of first aid within the Foundation is in accordance with the following Government guidance documents:

- First Aid in Schools: February 2014
- Supporting pupils in school with medical conditions: August 2017
- Guidance on the use of emergency Salbutamol inhalers in schools: 2015
- Automated external defibrillators (AEDs): a guide for maintained schools and academies: October 2019
- Using emergency adrenaline auto-injectors in school: September 2017
- Health and Safety: advice for schools: November 2018
-

This policy should be read in conjunction with each school's local procedures documents, and other Foundation Policies, procedure documents and risk assessments including:

- Health and Safety Policy
 - Food Allergy Policy 2021
 - School based Covid-19 risk assessments
 - Procedure if staff or students become unwell from covid-19

The WGSF arrangements for implementing the policy include eight key principles:

1. Places a duty on the Governing Body to approve, implement and review the policy.
2. Provides information for employees on the arrangements for first aid.
3. Places individual duties on all employees.
4. Provides training to employees, maintaining a record of that training and reviewing annually.
5. Establishes a procedure for managing accidents in school requiring first aid treatment.
6. Records, reports and where appropriate, investigates all accidents and near misses.
7. Provides equipment and materials to carry out first aid treatment.
8. Records all occasions when first aid was administered to employees, pupils and visitors.

SECTION 2: Arrangements for First Aid

2.1 Personnel

The School Nurse at each site takes responsibility for provision of first aid during school hours and her assistance is sought as required. During her absence, alternative provision is organised and staff notified. In QEGS Centenary House, and in WGHS St Johns House and Mulberry House appropriately trained staff will act under the overall supervision of the QEGS/WGHS School Nurses.

2.2 Appointment of First Aiders

WGSF School Nurses are contracted to provide First Aid cover during school hours. They are Registered General Nurses and will maintain first aid certification. The Governing Body acknowledges that unless first aid cover is part of an employee's contract, those who agree to become emergency first aiders do so on a voluntary basis. Employees are encouraged to volunteer to undertake paediatric or emergency first aid training in order to optimise health and wellbeing of students, colleagues and visitors. In the EYFS setting, most teaching and teaching support staff have a paediatric first aid qualification – see local documents re First Aid in the EYFS setting. A list of staff, with current paediatric or emergency first aid certification is publicised on the staff room notice boards. Records of those trained are kept by the School nurses and respective senior teams, along with copies of certificates

2.3 Equipment

First Aid boxes are strategically positioned around school and on school minibuses. These should not be removed. The boxes are regularly checked by the School Nurses and individual departments are responsible for alerting the Nurse if stocks need replenishing in-between checks. Extra are provided for residential and day trips.

2.4 Automated external defibrillators

(AEDs) are strategically placed around the school sites for emergency use:

QEGS	WGHS
Centenary House office will need to change once decided where it will go	Outside Head's PA's office
Senior school sports hall corridor	Forrest building outside the DT Office
Senior school main building, in corridor by office	Hartley Pavilion in the main entrance
Senior school games pavilion, outside first aid room.	Girls Pavilion at the playing fields near the social area and the PE office
Junior School Reception	Mulberry House Reception

An AED should be used in the case of sudden cardiac arrest, following instruction from the first aider present and/or Yorkshire Ambulance Service (YAS) during a 999 call. An AED can be used safely and effectively without previous training; its use should not be restricted to trained rescuers. Training should, however, be encouraged to optimise its safe and timely use. All staff are offered annual training updates alongside basic emergency life support and first aid training.

2.5 Facilities within school

In compliance with The Education (School Premises) Regulations 2012 the Governing Body ensures that first aid rooms are made available for medical treatment. Keys are stored with the school office, or known safe place in case access is required out of school hours.

2.6 Calling for an ambulance / Transporting to and from hospital

- Where an injury or illness is an emergency, an ambulance must be called. The decision to call for an ambulance is the responsibility of the first aider attending to the casualty. Parents, in the case of pupils, and next of kin in the case of employees/visitors, must then be informed, as soon as feasible.
- Where hospital treatment is required, but it is not an emergency, the school nurse will contact parents to arrange their child's collection, so that they can take over the responsibility. If the parents cannot be contacted, or are some distance away, the Nurse or member of the SLT may then decide to transport the pupil to hospital.
- Where the School Nurse or member of the SLT makes arrangements for transporting a child, then the following points will be observed:
 - i) Only staff cars insured to cover such transportation will be used;
 - ii) Determine whether 2 members of staff should accompany pupil in a vehicle;
 - iii) arrangements are made for parents to meet them at A&E

2.7 Infection Control Procedure

Hand Hygiene.

Hands should be washed and dried thoroughly and frequently. This is the single most effective method of infection control. Alcohol gel sanitisers are placed in numerous labelled locations around school for when hand washing is not practical.

Personal Protective Equipment.

Gloves must be worn when contact with blood or body fluid is likely. Protective gloves are stored in first aid boxes but Latex gloves must not be used due to the risk of allergy. Aprons may be used if there is a risk of spills. Face masks will be worn when offering first aid and social distance cannot be adhered to whilst Coronavirus exists.

Handling and Disposal.

Kits are kept by Ground staff to clear any fluid spillage such as vomit, diarrhoea or blood. They should be called to clean immediately to minimise the spread of infection.

Sponges and water buckets must never be used for first aid to avoid the risk of body fluid contamination.

Disposable yellow plastic bags must be used for any clinical waste which are collected by porters and disposed of in on-site clinical waste bins.

Food Handling.

Catering and Food Technology staff follow Food Hygiene Safety Regulations 2005 to minimise contamination.

Training.

Cleaners are to be aware of risks and procedures when cleaning rooms that may have become contaminated.

All new staff will be expected to read the First Aid policy, including IC, as part of their induction process.

Existing staff have been offered appropriate updates such as Prevent COVID 19 on Virtual College.

Environmental Cleaning.

School is cleaned daily with suitable detergent or disinfectant with special attention to colour coded cleaning to hard surfaces.

Enhanced cleaning and hygiene measures are in place in response to Pandemic situations such as COVID 19 and will be adhered to.

Respiratory Hygiene.

Cough etiquette and correct disposal of tissues is encouraged and mask wearing in social areas is mandatory unless exempt.

Exclusion.

A child will be excluded from school if they have a high temperature, gastric or respiratory illness and in some cases skin or eye infections according to HPA guidelines. Parents will be contacted if a child becomes unwell at school and may be asked to collect.

Immunisation.

Immunisation status is checked at school entry and any shortfalls noted. Catch up doses can be organised through the child's GP.

The School Immunisation Team will administer routine boosters to consented children and any new vaccines recommended by The Health Protection Agency in conjunction with government directives.

RIDDOR and HPA

The Health Protection Agency will be consulted for advice.

In the event of an outbreak of a notifiable disease a responsible person will provide details to Reporting of Injuries Diseases and Dangerous Occurrences Regulation 2013.

Information will be communicated to all staff to enable vulnerable children, adults and pregnant women to take appropriate action, and contact their GP.

Advice, Directives and Communication.

Vigilance will be applied to promote the latest Public Health England statements.

Compliance with current Government guidance to manage risk.

Confidentiality is respected. Openness is encouraged.

Posters, Assemblies and Personal Social Education lessons to promote good health.

2.8 Provision of first aid away from the School

A member of staff with relevant first aid certification should accompany groups on school trips; this will be determined by risk assessment. All EYFS trips have a paediatric trained first aider with them. First aid bags and pouches are available for school trips and are available from the School Nurse. First aid kits are also allocated on school minibuses, but must not be removed from the minibus.

SECTION 3 Provision of medical care

3.1 Provision of medical care

The school health service offers health advice to pupils and parents, coordinating first aid provision, triaging those that are ill/injured, supporting pupils with medical conditions, undertaking health checks and running a confidential drop-in. A full vaccination programme is offered at school

by the Wakefield Immunisation team, part of the Wakefield School Nursing, Health Visiting and Family Nurse Partnership Services.

Parents have prime responsibility for their child's health. They are encouraged to provide full information on school entry, about their child's health needs, including any food allergies or any medication taken. Annual updates are also requested. It is intended that this service should in no way replace the General Practitioner who would, normally, retain sole control over any prescribing for pupils; although some referrals to other health professionals can be made via this service.

If a pupil is taken ill at school, they should be directed to the School Nurse, or a nominated first aider, who will decide on appropriate care and treatment and whether they should go home; in which case parents will be informed to arrange collection. Pupils should not make their own arrangements with parents to be collected without first being assessed by the School Nurse. Where infection control is an issue, parents will be advised, in accordance with Public Health England guidance for schools, on recommended periods to be kept away. Employees will also be informed of instances of communicable diseases where their own health may be at risk.

3.2 Support for pupils with medical needs

- Health care plans for individual pupils, with specific medical conditions will be developed, by either a Specialist Nurse or the School Nurse, parents and the pupil (e.g. diabetes, anaphylaxis, asthma, epilepsy). It is the responsibility of parents to keep school up to date with changes, just as it is the responsibility of the School Nurse, as part of the pastoral team, to share any concerns with parents. Parental updates will be requested annually.
- Pupil's care plans, and other relevant health information will be made available to staff as deemed appropriate* by School Nurse/parents, in order to optimise their wellbeing. This information can be found in the SIMS database. Staff are reminded that any information provided is confidential under the Data Protection Act 1998. *Be aware that the School Nurse is bound by a professional code of conduct with regards to confidentiality, which means that they may be privy to some information regarding health that they cannot share.
- Prescribed medication such as EpiPens and inhalers should be carried by the pupils, depending on competence, at all times. In the case of those pupils deemed too young to carry their own medication, clear guidance must be provided to all staff regarding its location. Parents should ensure these medications are in date.
- WGSF Catering Manager does not order foods with nuts/seeds, that are known allergens, therefore snacks containing nuts and seeds are discouraged in school to prevent anaphylaxis for those students who have allergies. Those with severe allergies or food intolerances are supported to avoid possible cross contamination, and educated to manage their allergies independently. See also Food Allergy Policy 2021
- Antiperspirant and perfume sprays are not allowed in school to prevent an asthma attack being triggered, however, roll on deodorants are permitted
- Should staff have concerns regarding a pupil's health and wellbeing, the School Nurse should be approached for advice.
- The School Nurses will coordinate provision of information for staff on specific medical conditions and food allergies and updates as required. Staff should highlight their need for further training.

3.3 Administration of medication. Please refer to local procedures regarding medicine administration within each school.

- Any pupils requiring long term prescribed medication, will be referred to the School Nurse to discuss how this will be administered. Any long term treatment will be supported by a care plan.
- The School Nurse will not give non-prescription medication to pupils under 16 without parental consent. Consent forms are sent to all parents annually.
- All medications should be stored securely at each school site and should not be carried by pupils unless it is an EpiPen, Jext or Emerade, antihistamine or inhaler.
- Emergency Adrenaline Auto-injector (AAIs) devices are available for students with allergies and who have a prescribed AAI for their allergy, following guidance document: Using emergency adrenaline auto-injectors in school: 2017 which states that from October 2017, schools in England are allowed to purchase adrenaline auto-injector (AAI) devices without a prescription, for emergency use on children who are at risk of anaphylaxis when their own device is not available or not working.
- Emergency Ventolin inhalers are available for students with diagnosed asthma as per WGSF Emergency Inhaler Policy 2015, following guidance document: Emergency asthma inhalers for use in schools: 2015.
- The School Nurse or a qualified first aider will give short term prescribed medication e.g. antibiotics, ear/eye drops etc. if a covering letter is provided by parents, the medication is in its original container, which is clearly marked with name, dosage and frequency. Any prescribed, controlled medication (e.g. Ritalin, Diazepam) must be stored in a locked cupboard in the School Nurse's room if it has to be administered at school. Pupils must take any medication under adult supervision.
- Parents are encouraged to inform school of a pupil's long term medication regime regardless of whether that medicine is administered at school or not.
- Any medication given to pupils will be recorded in order to keep parents informed of medication given, reason for administration and time given.

SECTION 4: Record keeping

A daily log is kept of all attendees, including staff, visiting the school nurse. The records are kept for the preceding five years. By choosing to consult with the school nurse, that person is consenting to a confidential record being kept in accordance with the Nursing and Midwifery Council (NMC) Code of Conduct.

SECTION 5: Accident Reporting

Any employee, pupil or visitor sustaining injury / accident should be seen by the School Nurse or an emergency first aider for first aid treatment. All accidents and near misses, even if the injury is sustained out of school on school trips or sports fixtures, must be reported by the person witnessing the event to relevant Heads of Department/SLT and the School Nurse on return, so that accident forms can be documented on line EVOLVE accident book.

In the event of a significant incident or an outbreak of a notifiable disease the Compliance, Health & Safety Manager will notify the HSE via the online portal (RIDDOR) Reporting of Injuries Diseases and Dangerous Occurrences Regulation 2013.

For further details, please refer to the WGSF Health and Safety Policy.
